Death of Contract has some wickedly amusing moments. In his sections on the attempts by American jurists to codify contract law in a big fat Restatement on the topic, Gilmore paints a portrait of waffling legal academics who spent thirty odd years trying to work out whether estoppel has a place in the canon of Anglo-American contract law.

The Death of Contract is a book by American law professor Grant Gilmore, written in 1974, about the history and development of the common law of contracts. The Death of Contract is a masterful commentary on the common law, especially the law of promissory obligation known as contracts. In this slim and lively book, the late Yale law professor Grant Gilmore examines the birth, development, death, and even the resurrection of a body of American law. It is both a modern-day reply to and a funeral oration for an American legal classic--Oliver Wendell Holmes's The Common Law. This new edition, with an instructive and timely foreword by Ronald K. L. Collins, challenges anyone interested in the life of the law to think about where it has come from and where it is tending. As such, The Death of Contract still retains its vitality in the brave new world of the law known as contracts. A new bibliography of early reviews and new responses reveals how considerable the interest was, and continues to be, in this modern anti-classic.

Since its initial publication, scholars and students alike have turned to Keywords for American Cultural Studies as an invaluable resource for understanding key terms and debates in the fields of American studies and cultural studies. As scholarship has continued to evolve, this revised and expanded second edition offers indispensable meditations on new and developing concepts used in American studies, cultural studies, and beyond. It is equally useful for college students who are trying to understand what their teachers are talking about, for general readers who want to know what's new in scholarly research, and for professors who just want to keep up. Designed as a print-digital hybrid publication, Keywords collects more than 90 essays—30 of which are new to this edition—from interdisciplinary scholars, each on a single term such as “America,” “culture,” “law,” and “religion.” Alongside “community,” “prison,” “queer,” “region,” and many others, these words are the nodal points in many of today's most dynamic and vexed discussions of political and social life, both inside and outside of the academy. The Keywords website, which features 33 essays, provides pedagogical tools that engage the entirety of the

book, both in print and online. The publication brings together essays by scholars working in literary studies and political economy, cultural anthropology and ethnic studies, African American history and performance studies, gender studies and political theory. Some entries are explicitly argumentative; others are more descriptive. All are clear, challenging, and critically engaged. As a whole, *Keywords for American Cultural Studies* provides an accessible A to Z survey of prevailing academic buzzwords and a flexible tool for carving out new areas of inquiry. Visit keywords.nyupress.org for online essays, teaching resources, and more.

Following its publication in 1974, Grant Gilmore's compact portrait of the development of American law from the eighteenth century to the mid-twentieth century became a classic. In this new edition, the portrait is brought up to date with a new chapter by Philip Bobbitt that surveys the trajectory of American law since the original publication. Bobbitt also provides a Foreword on Gilmore and the celebrated lectures that inspired *The Ages of American Law*. "Sharp, opinionated, and as pungent as cheddar."—*New Republic* "This book has the engaging qualities of good table talk among a group of sophisticated and educated friends—given body by broad learning and a keen imagination and spiced with wit."—Willard Hurst

Civil wrongs occupy a significant place in private law. They are particularly prominent in tort law, but equally have a place in contract law, property and intellectual property law, unjust enrichment, fiduciary law, and in equity more broadly. Civil wrongs are also a preoccupation of leading general theories of private law, including corrective justice and civil recourse theories. According to these and other theories, the centrality of civil wrongs to civil liability shows that private law is fundamentally concerned with the expression and enforcement of norms of justice appropriate to interpersonal interaction and association. Others, sounding notes of caution or criticism, argue that a preoccupation with wrongs and remedies has meant neglect of other ways in which private law serves justice, and ways in which private law serves values other than justice. This volume comprises original papers written by a wide variety of legal theorists and philosophers exploring the nature of civil wrongs, their place in private law, and their relationship to other forms of wrongdoing.

Final issue of each volume includes table of cases reported in the volume.

It describes all of the traditional areas of actuarial activity, but in a manner that highlights the fundamental principles of actuarial theory and practice as well as their economic, financial, and statistical foundations.

In this introductory text on thanatology, Alan Kemp continues to take on the central question of mortality: the centrality of death coupled with the denial of death in the human experience. Drawing from the work of Ernest Becker, *Death, Dying, and Bereavement in a Changing World* provides a multidisciplinary and multidimensional approach to the study of death, putting extra emphasis on the how death takes place in a rapidly changing world. This new, second edition includes the most up-to-date research, data, and figures related to death and dying.
