Electrical Services | Electrical Instrumentation Services ...
(November 2019) Instrumentation and control engineering (ICE) is a branch of engineering that studies the measurement and control of process variables, and the design and implementation of systems that incorporate them. Process variables include pressure, temperature, humidity, flow, pH, force and speed. ICE combines two branches of engineering.

Instrumentation and control engineering - Wikipedia
At least 3 years of relevant Electrical & Instrumentation (E&I) field service experience in the Oil & Gas industry Proficient in Baker Hughes / General Electric (GE) / Nuovo Pignone product lines Proficiency in English is an added advantage, to convey technical concepts effectively
