J Prop Feathering Propeller Specification Form
The second is the feathering prop, where the blades turn parallel to the flow of water, presenting a minimal profile. The third is the self-pitching featherer. While swapping your existing prop for a swing blade alternative may be a significant outlay, perhaps £1,000-£2,500 or more for a high-quality feathering model, it will be a long-term investment that will keep paying back.

Feathering and folding propellers - Sailing Today
The new-concept Axiom prop excelled in this test, but nearly all the feathering props were better at bringing the boat to a standstill than the standard prop. The folding props were less effective and some of them were less than 100% reliable when called upon to perform an emergency stop.

Folding and feathering propeller test - Yachting Monthly
Two of the most well-known brands, Max-Prop and Autoprop, also illustrate the two different approaches to feathering-propeller technology. On the Max-Prop the blades flip through 180 degrees when going astern so that pitch and thrust are the same in either direction—in fact, in reverse a Max-Prop provides better performance than a fixed-bladed prop.
